- 2 Defense and Class Report Patterns
- 3 Colour Palette and Typography
- 4 Research Talk Content
- 5 Tables and Figures
- 6 Closing

Getting Started

Load the theme in your preamble, set your metadata, and compile from the checked-in `beamer-up/` directory:

- `\usetheme{UP}` — basic usage
- `\usetheme[showlogo]{UP}` — logo on every slide
- `\usetheme[showlogo,english]{UP}` — English UP logotype
- `\usetheme[showlogo,filipino]{UP}` — Filipino UP logotype

Recommended compile path: `latexmk -pdf main.tex`.

Fallback path: `pdflatex, biber, pdflatex, pdflatex`.

For a fuller walkthrough, see the repository usage guide at `docs/usage-guide.md`.

Flags

Pass as options to `\usetheme[...]{UP}`:
`showlogo`, `english`, `filipino`, `nl`,
`nosectionpage`.

Special Frames

`\standoutframe{...}` for emphasis.
`\thankframe{...}{...}` to close.
`\sectionframe{...}` for a manual divider.

Conference Title Support

`\multiauthor` activates the multi-author layout. Use `\addinstitute{n}{Name}` to list affiliations and `\venue{...}` for the event label.

Public Contract

The supported public loader is UP.

The `showlogo` flag is active in this demo, so the top-right identity mark remains visible on normal content slides.

Thesis Defense

Start with the single-author title path, then use section dividers to separate problem, method, results, and contribution.

Class Report

Use concise bullets, tables, and diagrams. The content surfaces are designed to stay readable while keeping the UP visual direction.

Research Talk

Use the multi-author title page, optional venue, numbered figures, citations, and bibliography frame for colloquia or conference presentations.

This checked-in deck now tries to demonstrate all three paths in one reusable source.

Manual \sectionframe for proposal milestones

Defense and Class Report Patterns

A common defense structure can fit the template without custom macros:

- 1 Problem statement and scope
- 2 Related work or institutional context
- 3 Method or system design
- 4 Results, limitations, and next steps
- 5 Contribution summary and committee discussion prompts

Use automatic section pages for the major milestones and a manual `\sectionframe{...}` when you need an explicit pivot slide.

Recommended rhythm

- one headline claim per slide
- short bullets instead of paragraph walls
- figures or tables when comparison matters
- one takeaway at the bottom when the result is easy to miss

Example takeaway

For weekly reports or laboratory updates, a simple title, three bullets, and one chart is often stronger than a dense text slide.

Migration reminder

If your older deck still uses other themes, consider migrating them to `\usetheme{UP}` before reusing this template.

Colour Palette and Typography

Core Palette

-  Maroon #8E1537
-  Forest green #005740
-  Yellow #FFB81D
-  Spot black #231F20
-  White #FFFFFF

Usage Rules

-  Maroon carries hero surfaces and alerts.
-  Forest green supports section structure and examples.
-  Yellow stays an accent for rules, bullets, and emphasis.
-  Spot black anchors body text and labels on yellow.

The public theme stays inside the UP four-colour system as defined by the UP Visual Identity Guidebook [1].

- 1 **Optima** for titles and headings when locally available
- 2 **Palatino** for body text on the validated baseline
- 3 **Avenir/Helvetica** as documented heading fallbacks

Tiered Font Fallback

The theme selects a practical fallback chain rather than assuming every system has the same commercial fonts installed:

- **XeLaTeX/LuaLaTeX:** Optima -> Avenir -> Helvetica
- **pdfLaTeX:** Helvetica-style sans fallback with Palatino body text

Compile with `xelatex` or `lualatex` for Optima when it exists on your system.

Itemize now uses a single yellow marker family across levels:

- First-level items use yellow squares
 - Second-level items stay yellow and shrink with depth
 - Third-level items keep the same accent hue for consistency
- Items can contain **bold**, *italic*, or alerted text
- Keep bullets concise and let spacing carry hierarchy

Enumerate uses dark labels on yellow chips:

- 1 Background or objective
- 2 Method or implementation note
- 3 Result or recommendation

The theme supports mathematical typesetting for technical defenses and research talks [2]:

$$\int_a^b f(x) dx \approx \frac{h}{2} \left[f(x_0) + 2 \sum_{i=1}^{n-1} f(x_i) + f(x_n) \right]$$

Note

This is an alert block, suitable for assumptions, constraints, or a result that the audience should not miss during a defense or report.

Research Talk Content

Figure 1: Example research pipeline with a numbered figure caption.

TikZ diagrams stay inside the mapped UP token set. Use `UPYellow`, `UPForestGreen`, `UPMaroon`, and `UPBlack` directly.

The `listings` package is pre-configured with UP colours. Specify the language and write code verbatim:

```
1 def fibonacci(n):
2     """Return the n-th Fibonacci number."""
3     if n <= 1:
4         return n
5     a, b = 0, 1
6     for _ in range(2, n + 1):
7         a, b = b, a + b    # shift window
8     return b
9
10 print(fibonacci(10))    # 55
```

Tables and Figures

Table 1: Theme files overview

File	Purpose
<code>beamerthemeUP.sty</code>	Canonical public theme entry
<code>beamercolorthemeUP.sty</code>	Current UP-directed colour theme
<code>beamerinnerthemeUP.sty</code>	Title page, blocks, special frames
<code>beamerouterthemeUP.sty</code>	Frame title, footline, logo

Pair figures with text using `columns`:

- left column carries the narrative
- right column holds the figure
- caption numbering stays automatic

This pattern works well for class reports, proposal updates, and research results where one compact figure has to sit beside the argument.

Figure 2: Sample bar chart with UP colours.

Honor. Excellence. Service.

Closing

- Preferred command from `beamer-up/`: `latexmk -pdf main.tex`
- Fallback command chain: `pdflatex, biber, pdflatex, pdflatex`
- Public quick-start and migration notes live in `README.md` and `docs/usage-guide.md`
- UP-branded assets remain subject to branding guidance beyond the software license

- 1 Supported public loader: `\usetheme{UP}`
- 2 Starter patterns now cover thesis defenses, class reports, and research talks
- 3 Special frames: `\standoutframe`, `\thankframe`, `\sectionframe`
- 4 Options: `showlogo`, `english`, `filipino`, `nl`, `nosectionpage`
- 5 Multi-author slides: `\addinstitute{n}{Name} + \multiauthor`
- 6 Public usage and migration guidance now live alongside the checked-in showcase source
